Certification Type Requested: (Check all that apply to your operation; obtaining multiple certifications at a facility does not increase the inspection fees due for service.)

- Wood Packaging Facility.** This is a facility that produces finished pallets, skids, crates, or custom packaging either for sale or for their own company's use in exporting goods.
- Heat Treatment Facility.** This is a facility that has a chamber or kiln designed to (a) heat treat solid wood materials to be used in the construction of wood packaging for export, such as lumber, timbers, or components, and/or (b) to heat treat finished wood packaging such as pallets, skids, and crates.
- A Re-Manufacturer of Heat Treated Materials.** This is a facility that purchases heat treated (HT-stamped) lumber and re-manufactures the material into components FOR RESALE to another wood packaging facility.

I hereby apply for inspection services of the Northeastern Lumber Manufacturers Association. I have reviewed and signed the applicable "Service Agreement(s)" based on the certifications I have requested. Upon acceptance, I will abide by the terms of inspection required by the Association to maintain certification in the program.

Signature: _____ **Date:** _____

Note: A separate application is required for each manufacturing facility of the company that is applying for inspection services of the Northeastern Lumber Manufacturers Association. Subsequently, each facility will be accessed fees separately based on their individual operation.
